Common E-L Commands

Artifact references

copy-as-kill — **C-z x**
With cursor on reference or artifacts / drafts plex will copy references. `C-y` to insert.
follow-link — **C-z ^**

Artifacts

edit-artifact — **C-z C-e**
With cursor on reference, or in artifacts plex, move cursor to correct screen before confirming. Creates new draft
examine-artifact — **C-z C-x**
Read only
pop-to-artifact
Buffer on artifact in another window
derive-from
Force derivation
delete-one-artifact — **C-z C-d**
If not referenced, no active draft
delete-artifact-and-references — **C-z M-d**
delete-artifacts-in-region — **C-z M-D**
In window on artifacts plex
archive
Stores down. If 2 or 3 `C-us` stores up as well
import-archive
1 or 3 `C-us` to override timestamp. 2 or 3 `C-us` to override creator
export-derivative
Copy derivative to Unix file

Drafts

commit-one-draft — **C-u C-z C-s**
Just this draft and don't schedule anything
commit-one-draft — **C-z C-s**
Just this draft
commit-draft-and-references — **C-z M-s**
This and down
commit-draft-and-references-and-referencers
This, up and down — **C-z M-C-s**
create-draft — **C-z C-c**
Creates draft and buffer for it use C-x C-b *name* to get to buffer
create-draft-and-reference — **C-z M-c**
like `create-draft` but also inserts reference at point in buffer
delete-draft
Also `C-x k` on only buffer on draft
abandon-draft — **C-z C-a**
To hand off to another user
takeover-draft — **C-z e**
To take over abandoned draft
revert-draft
Restore buffer to last autosave
find-successor-draft
In drafts plex; Of some artifact

Notices and Pending

display-notice — **C-z C-n**
Display text of notice
delete-notice — **C-z M-n**
Delete selected notice
act-on-pending-item — **C-z C-p**

LaTeX

latex-log
Examine LaTeXlog
preview
Preview with xdvi
ps-file
Create Postscript file
hardcopy
Print document or `latex-piece` section

Unix / C

highlight-region — **C-z C-h**
Affects code going into .h file
execute
A `unix-program`
dbx
A `unix-program`
stop-at-c-line — **C-z C-@**
`dbx` breakpoint at current line of artifact
examine-problems
Like `display-notice` but for artifact
pop-to-artifact-per-cursor — **C-z '**
While on `display-notice/problems` line pop up source artifact and highlight

Search, Diff and Merge

re-search-artifacts-recursively — **C-z s**
Search artifact and descendants
diff-buffers
unbutton — **C-z u**
Removes highlighting, `C-u C-z u` removes highlighted text
diff-artifacts
diff-selected-artifact
diff-artifacts-recursively
merge-artifacts
Also affects references to the artifacts
merge-selected-artifact
merge-artifact-into-draft
merge-drafts

Plexes

view-plex — **C-z C-v**
+1 `C-u` for special filter, +2 `C-us` for special format `C-]` for no more filter or format selections, `M-]` to restart selections with changes, `M-C-]` to restart from beginning state
refilter — **C-z C-i**
reformat — **C-z C-o**

System management

newuser
Currently automatic
delete-user
stop-job-server
start-job-server
After `stop-job-server` please
goodbye-hostport
Pings port to check if alive, removes if not
find-missing-draft
After crash, then `goodbye-hostport` on returned port, will release draft owned by crashed job to your use
